

## NuStart

A natural performance enhancer that supports the development of young ruminants through:

- Supporting gut microflora to aid digestion of nutrients for the young animal.
- Aiding rumen development to enable the utilisation of solid food and reduce growth checks.
- Increasing dry feed intake and improving feed efficiency to improve growth.
- Improving performance in early life to reduce overall cost per kg growth and increase profit.

Available in both ProviMilk Shepherdess and Lambkin, and also available to be included in starter diets.

## Feeding instructions for ProviMilk lamb milk replacers

Time	Instructions
Day 1	1/2 litre of colostrum in 3 to 4 feeds.
Day 2 - 7	1/2 litre per day of lamb milk replacer, increasing gradually to 1 litre daily.
Day 8	Feed 1.5 litres per day split into 4 equal feeds.
After the first week	Each extra week drop number of feeds by one and increase volume to appetite. Wean normally at 5 to 6 weeks.

## Mixing instructions for lamb milk replacers

Mix 200 grams of milk powder into 800 millilitres of water to make 1 litre of ready to feed milk. The optimal drinking temperature is 40 to 42°C. Milk needs to be fed out straight after preparation.

- 1 Take two-thirds of the required amount of water at a temperature of 55°C.
- 2 Add milk powder to this water and mix thoroughly.
- 3 Add the remaining water cold and mix thoroughly.

*For other species please refer to the Multimilk packaging.*

## Our Quality Promise to you

You can always be confident with the ProviMilk Lamb Range that your lambs benefit from a highly digestible, nutritious and safe feed. Our ongoing rigorous testing and quality control processes ensures that the ProviMilk:

- Always mixes easily
- Contains only the highest quality and highly digestible ingredients
- Uses only premium skimmed milk powders, no cheaper alternatives
- Contains raw materials from sustainable sources
- Performs consistently on-farm

Provimi™ is brand of Cargill®; a family-owned company with more than 150 years' experience in developing food and feed ingredients. Cargill® develops results-oriented nutritional solutions and feeding programmes, which in turn help producers grow their business. Premixes and concentrates, speciality feeds and additives are produced under the Provimi™ brand.

# ProviMilk Lamb Range

Good nutrition and management in early life will impact on the lifetime performance of an animal; so taking time to choose the most appropriate diet and feeding system from birth is essential.

The ProviMilk Lamb Range has been developed with both you and your lambs in mind; products are easy to mix, simple to feed and contain a distinctive flavouring to ensure they are highly palatable and maximise feed intake in young lambs. The range comprises of three milk replacers; ProviMilk Shepherdess, ProviMilk Lambkin and ProviMilk Multimilk. We also supply

Shepherdess Lamb Colostrum and the Shepherdess Lamb Feeder.

The ProviMilk Lamb Range incorporates new ingredient technologies to improve physical characteristics and animal performance. Carefully selected ingredients ensure the range meets the nutritional requirements of rapidly developing young lambs.

## Lamb Milk replacers

A range of lamb milk replacers for feeding to young or orphan lambs, providing them with an optimal start in life.

### ProviMilk Shepherdess

- Whey based for cost-effective rearing
- 23.5 % crude protein, 24% fat
- Contains **NuStart**, a natural gut conditioner
- Suitable for all rearing systems; machine, bucket and bottle feeding
- Available in a machine grade version
- Available in 5kg, 10kg and 20kg bags

### ProviMilk Lambkin

- Skim based for fuller for longer and healthy lambs
- 23% crude protein, 23% fat
- Contains **NuStart**, a natural gut conditioner
- Suitable for bucket and bottle rearing systems
- Available in 10kg and 20kg bags

### ProviMilk Multimilk

A versatile multi-purpose milk replacer, suitable for a variety of young mammals including; lambs, kids, foals and puppies.

- Skim based for optimal digestion of the milk proteins
- Multi-purpose - can be used for a range of young animals
- 23% crude protein, 23% fat
- Available in 5kg bags

ProviMilk lamb milk replacers are:

- Formulated to match the nutritional profile of ewe's milk and meet all the nutritional requirements of the lamb.
- Easily mixed and stay in suspension assuring consistent balanced nutrient intake.
- Fortified with highly digestible milk proteins for optimum growth, development and health.
- High in available energy for the lamb through a balanced blend of emulsified fats and oils providing optimal fat digestibility.
- Antioxidants to promote health and immune function.
- Fortified with trace elements and vitamins to meet the requirements of rapidly developing young lambs.

## Shepherdess Lamb Colostrum

A complementary water soluble colostrum feeding stuff for newborn lambs designed to complement or replace maternal colostrum when in short supply, or of variable quality.

Contains:

- **NuStart**, a natural gut conditioner
- Natural antioxidants to support a healthy immune system

## Shepherdess Lamb Feeder

A unique milk feeder offering the ideal start in life for orphan lambs giving consistent warm feed 24 hours per day.

- Eliminates the need of bottle feeding, reducing labour
- Milk is kept at a constant temperature between 22-32°C
- Allows for natural feeding behaviour providing orphan lambs with a flying start
- Each feeder can feed up to 20 lambs
- The feeder is unaffected by freezing conditions and still effective at minus 8°C
