**Helps maintain water balance in the bird**

---

**Stimulates water intake**

---

## Solulyte

A complementary feedstuff for poultry containing a blend of electrolytes, Vitamin B2 and flavours. Designed for strategic use to optimise water consumption and supply essential body salts.

**Blend of electrolyte salts  
Flavours**

### Objectives:

- Encourage water consumption.
- Supply vital electrolytes.
- Support optimum hydration.
- Maintain condition during high ambient temperatures.

### Product Indications:

- Following transport or reduced water availability.
- During excessive fluid/water loss.
- Prior to and during extremes of temperature in excess of 25°C to help birds acclimatisation.

### Technical Interest:

**Hydration:** Maintaining optimum hydration in chicks and adult birds helps support digestion, feed intake and electrolyte status. It is particularly important in day old **chicks to help ensure a good start.**

**Electrolyte maintenance:** Optimum growth and digestive function rely on ionic salts to maintain metabolic function, blood pH and adequate water absorption/retention. The presence of salts can actively encourage water consumption.

**Flavours:** Act as an attractant to birds and improves palatability, supporting the desire to drink.

# SolviTec®

For Poultry

A complementary feedstuff for poultry containing a blend of electrolytes, Vitamin B2 and flavours. Designed for strategic use to optimise water consumption and supply essential body salts.

#### Benefits:

- Support welfare during high ambient temperatures.
- Helps maintain FCR and weight gain via optimum hydration.
- Product cost effectively applied as required.
- Pro-active application to help acclimatisation to variations in environment temperature.
- Support water consumption to help hydration.

## Solulyte

When to apply:

✓  
1-2 days  
following  
transportation

✓  
2-3 days  
during periods  
where  
rehydration is  
required

Solulyte

#### Application:

Add 2,000ml of **Solulyte** liquid to 1000 litres of clean drinking water. Ensure Dosatron™ stock solution is calibrated for appropriate uptake. No manual stirring is required. Product can be used as standard management practice or during individual cycle cases of digestive stress according to the discretion of the farm manager. To maintain drinking lines and water quality, any water application should be followed with a suitable 1:50,000 dilution of sanitiser.

#### Storage:

Store in cool and dry place away from direct light. Keep away from children.

**Shelf Life:** 24 months from date of manufacturing.

**Pack Size:** 5L Jerrycan & 1L Bottle.
